

**Acme Township Development
Storm Water Run-Off**

December 16, 2014

Observations:

I made an onsite visit today to the new development in Acme Township. Kent McGill from Elmer's inspected the site with me. The site looked good. Looked at the area by the Dinner Theater where the water has been forming a pond. The water has been infiltrating in the ground. There was less water than the inspection that was done on 12-10-2014.

Corrective Actions:

- Contractor still needs to continue to monitor a silt fence on the site to prevent further run-off from the site.

Overall the contractor still needs to work with the Horizon Environmental to get the site stabilized. The contractor does have some good measures in place to keep storm water from leaving the site but the biggest thing is to get the site stabilized.
