

Acme Township, Grand Traverse Town Center
Statement from Chris Groebbel

Subject: VGT Site Inspection, 12/17/14

In response to reports of the presence of algae within Acme Creek downgradient of the VGT/GTTC site, I visited the site yesterday afternoon (12/17) and walked the Creek with a representative of Horizon Environmental.

No evidence of unusual or accelerated algae growth was observed in any part of Acme Creek inspected adjacent to or downgradient of the VGT/GTTC property during that site visit.
