Williamsburg, MI 49690

Project: **MDEQ Violation – Sanitary Sewer**

Remarks:

In regards to the Part 41 MDEQ violation, I wanted to provide you with an update on activities to address MDEQ's concerns.

- The project engineer Gordie Fraser will be meeting with the Township Engineer, Gosling Czubak and Jozwiak Consulting regarding the status of the sanitary sewer installation and discuss the steps needed to respond to MDEQ. This week is slated to take place the week of Feb 3.
- As built drawings are being finalized and the sewer system is being televised to provide the documentation to MDEQ.
- A technical team meeting will be convened with MDEQ the week of Feb 9th to discuss the issues outlined in the violation letter and determine the actions needed to respond to those concerns.

In conversations with the developers representative, Steve Schooler, VGT will take the appropriate steps and actions needed to address the MDEQ violation and obtain the necessary permit. "We will do whatever it takes to help get this resolved." (2-2-2015 email).

If the Board has any questions please feel free to contact me. I will provide a status update the week of Feb 16th once all technical meetings have been held and I have additional information to share.

Thank you.
